The FIFA World Cup is an international football tournament held every four years, bringing together the best national teams from around the world. Organised by FIFA (the Fédération Internationale de Football Association), it is one of the largest and most-watched sporting events globally. Teams compete through qualifying matches to earn a place in the tournament, where they play against one another to become world champions. The World Cup celebrates sport, teamwork and international unity, while giving countries the opportunity to showcase their talent on the world stage.

Five Top Facts About the 2026 FIFA World Cup

The tournament is being hosted by three countries – the United States, Canada and Mexico are jointly hosting the World Cup, making it the first tournament to be shared by three nations.

It is the biggest World Cup ever – for the first time, 48 teams are taking part, an increase from the previous 32-team format.

Mexico is making history – Mexico has become the first country to host World Cup matches in three different tournaments (1970, 1986 and 2026).

More matches than ever before – the expanded format means there will be 104 matches played throughout the tournament.

Football brings the world together – billions of people around the globe are expected to watch the World Cup, making it one of the most-watched sporting events in the world.

office before or on the day.**

**Additionally, feel free to check the
lost property box while you're here!**

Healthy Hydration

Why Water?

We are made up of approximately 60% water and it performs many vital functions in our bodies. If we do not drink enough water, we become dehydrated which can make us feel very unwell.

Here are some of the potential health benefits associated with drinking water:

clearer skin

better concentration and memory

improved mood

better digestion

more energy

fuelled muscles

healthier joints, bones and teeth

healthier heart and circulation

How much should I drink?

Children older than 8 should drink between 1.3 and 1.7 litres each day.

That's 6-8 glasses each day or approximately 3 water bottles.

If you are exercising, or it is hot, you will need to drink more.

When should I drink?

You should drink regularly throughout the day, but try to drink some water:

- when you wake up
- when you feel hungry
- if you feel tired
- before, during and after exercise
- before eating
